A black and white photograph of President William Samoei Ruto of Kenya speaking at a wooden podium. He is wearing a dark suit and a patterned tie. The podium has a microphone and some papers on it. In the background, a large, ornate room with high ceilings and arched windows is filled with people seated at tables, listening to the speech. The room has classical architectural details, including a large mural or relief on the wall behind the speaker.

In 2024, ICCF hosted the President of Kenya, H.E. Dr. William Samoei Ruto, at a congressional luncheon in Washington, D.C.

OUR MISSION

THE ICCF
GROUP WORKS
TO ADVANCE
CONSERVATION
GOVERNANCE
BY BUILDING
POLITICAL
WILL,
PROVIDING
ON-THE-
GROUND
SOLUTIONS

WHAT WE DO

- **We build political will,**

The ICCF Group advances leadership in conservation by building political will among parliamentary and congressional leaders, and by supporting ministries in the management of protected areas.

- **Catalyzing change with knowledge and expertise,**

We support political will to conserve natural resources by catalyzing strategic partnerships and knowledge sharing between policymakers and our extensive network.

- **To preserve the world's most critical landscapes.**

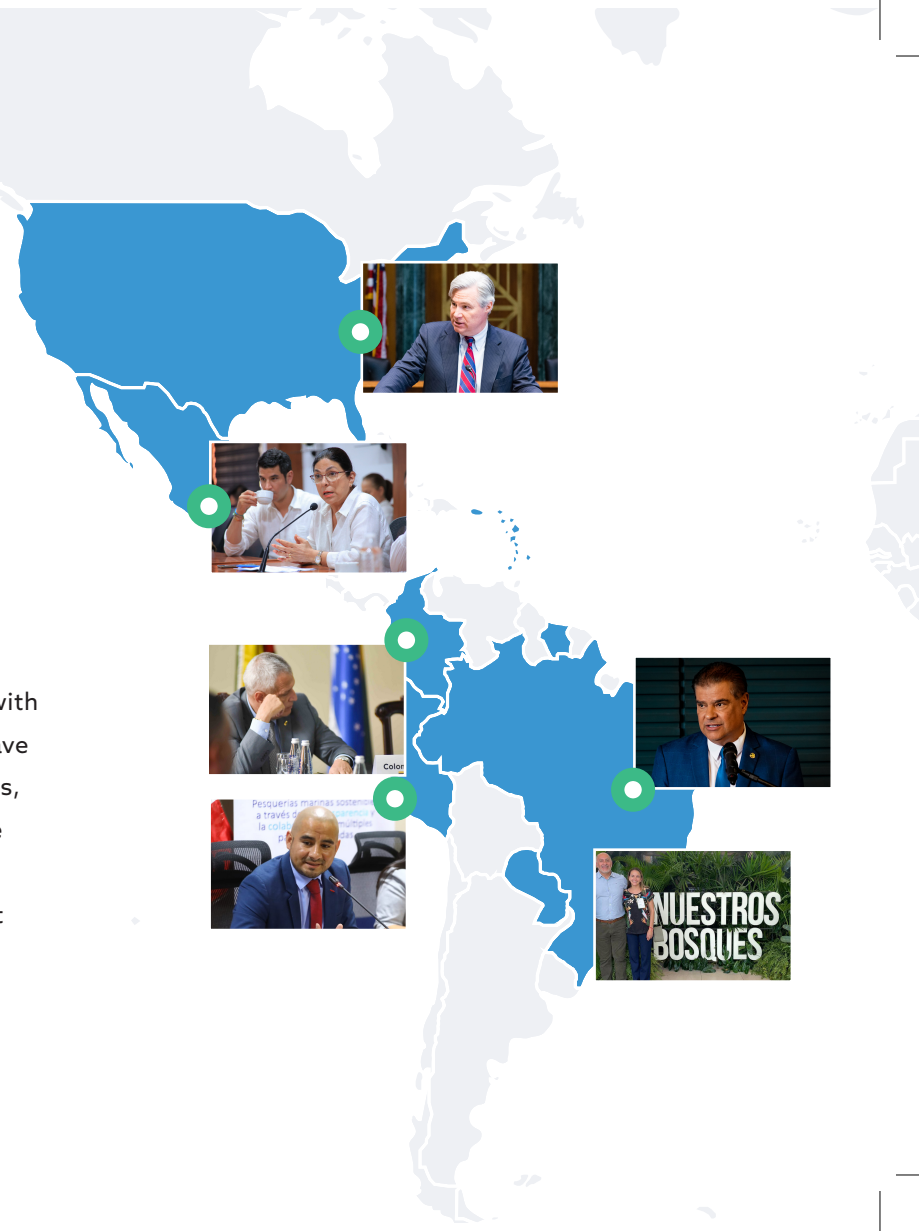

Legislative outcomes, public-private partnerships, & land management demonstrate our model is a cost-effective, sustainable solution to conservation governance challenges.

WHERE WE WORK

The ICCF Group has offices in the United States (ICCF U.S.), Africa (ICCF Kenya), Europe (ICCF-UK), Asia (ICCF Indonesia), and Latin America (ICCF Colombia). Each ICCF office is established as a separate legal entity, registered in the host country, with its own Board of Directors. These entities have charitable status in their respective countries, and their role is to further the mission of the ICCF Group. These separate legal entities are bound by a collaboration agreement that ensures a common purpose for all.

THE ICCF INTERNATIONAL CONSERVATION CORPS PROGRAM

Through the International Conservation Corps program, the ICCF Group provides expertise to help partner nations develop protected-area, wildlife management, and conservation strategies.

International Conservation Corps team members are veterans of U.S. and Canadian government agencies such as U.S. National Park Service, U.S. Forest Service, U.S. Bureau of Land Management, and U.S. Fish & Wildlife Service, and each member has decades of practical experience managing national parks, wildlife, forests, and water.

These professionals work to complete demanding projects in countries in Latin America, Asia, Africa, and the Caribbean.

A photograph capturing a moment of support or welcome. In the foreground, the back of an older man with grey hair, wearing a brown jacket, is visible. A woman with dark hair, wearing a dark blazer, has her right hand resting on his left shoulder. The background is softly blurred, showing an indoor setting with bright, circular lights, likely a workshop or conference room.

THE INTERNATIONAL CONSERVATION CORPS DEPLOYS SEASONED PROFESSIONALS WHO HAVE DECADES OF REAL-LIFE EXPERIENCE IN PROTECTED AREAS AND NATURAL RESOURCES MANAGEMENT.

The International Conservation Corps program is a highly effective, low-cost means of providing technical assistance, helping partner nations to fulfill their objectives and to develop institutional and human capacity. The program is the least costly way to project the vast U.S. experience in the management of national parks and natural resources in useful ways overseas, and it is more effective than other forms of technical assistance from the U.S., from other countries, and from often highly paid consultants.

U.S. and Canadian conservation agencies have long realized the potential of expanding their mission beyond their own borders to provide assistance and expertise in key regions but have lacked the funding to properly sustain international programs.

The International Conservation Corps has the systemic capacity to channel the experience and talent of these respective agencies and retired experts to meet the specific needs of partner nations and provide the necessary funding and in-country political support through the ICCF Group.

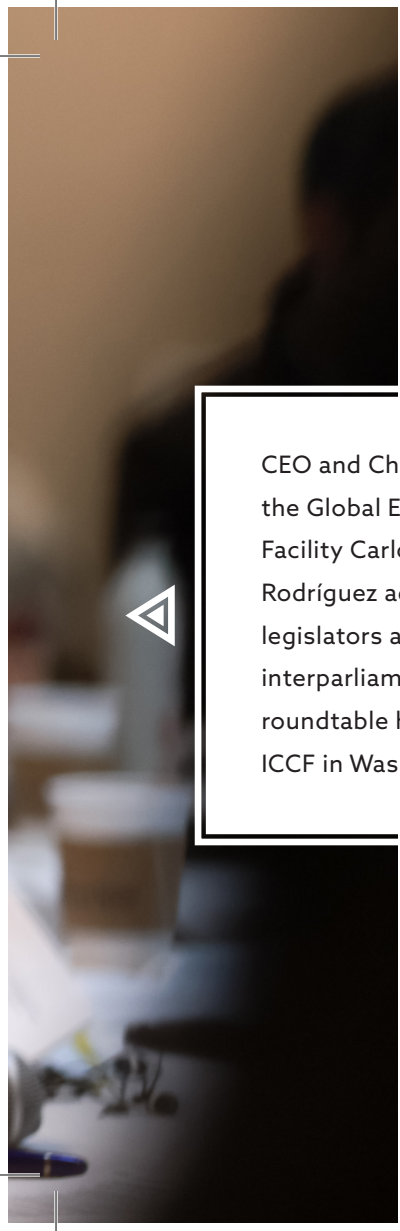

GLOBAL CHALLENGES

Although most developing nations have set aside large areas for preservation, and much has been accomplished to scientifically catalogue critical natural resources, most of these nations lack the human and institutional capacity needed to manage these natural resources, leading to the destruction of biodiversity, water, and forests which are vital sources of environmental security, aesthetic value, cultural heritage, food security, and sustainable economic development.

This lack of capacity leads to unsustainable use and destruction of natural resources through inappropriate development, unmanaged tourism, poaching, erosion, pollution, and other problems.

To support the worldwide growth in human population and consumption, it is imperative to help overcome this global management deficit to ensure that economic and other benefits perpetually convey from ecosystems to forestry, fish, and wildlife sectors, the tourism industry, and agribusiness.

CEO and Chairperson of the Global Environment Facility Carlos Manuel Rodríguez addresses legislators at an interparliamentary roundtable hosted by ICCF in Washington, D.C.

THE ICCF GROUP AND LEGISLATURES

HOW THE CAUCUS MODEL IS TRANSFORMING CONSERVATION GOVERNANCE AROUND THE WORLD.

As an organization on the global political stage, the ICCF Group is breaking ground, empowering hundreds of parliamentarians to reach across the aisle and sponsor legislation that, while covering a wide range of issues, shares a common purpose: To strengthen a country's legislative framework in a manner that isn't exclusively good for the planet, but for economies and local communities as well.

PROVEN RESULTS

Our work to share globally a legislative model with proven results in the United States has led parliamentarians abroad to embrace a new approach to governance, one characterized by nonpartisanship and a focus on topics on which political parties can find common ground.

Priorities are identified and agreed upon by the parliamentarians. The ICCF Group provides support, growing the caucus within the legislature and catalyzing strategic partnerships and knowledge sharing between its policymakers and our extensive network.

2025 Launch of
the Suriname
Conservation Caucus

1. To promote the protection and conservation of the natural resources of Suriname, including the marine environment, and to ensure the sustainable use of these resources.
2. To strengthen the capacity of the Suriname Conservation Caucus to address the environmental and conservation challenges facing the country.
3. To promote the participation of the Suriname Conservation Caucus in the development and implementation of national and international environmental and conservation policies and programs.
4. To cooperate with relevant government agencies, including the Ministry of Environment and Forestry, and other stakeholders in the conservation and sustainable development of Suriname.

ICCF IN THE U.S.

In Washington, D.C., ICCF advances U.S. leadership in international conservation through public and private partnerships and developing the next generation of conservation leaders in the U.S. Congress.

- **Informing policy:** ICCF educates and acts as secretariat to the leadership of the bipartisan U.S. Congressional International Conservation Caucus, made up of more than 1/3 of the U.S. Congress.
- **Building political will:** We bring together leaders at the highest levels of government, business, and the NGO community, setting the conservation and environmental agenda by coordinating people with scientific expertise, organizations that support and manage programs on the ground, and policymakers who shape legislation.
- **Championing public-private collaboration:** Through ICCF, public- and private-sector organizations collaborate and seek consensus on conservation issues and share their expertise with policymakers, providing sound, market-oriented conservation solutions with the highest standards in accountability, effectiveness, and transparency.

119TH U.S. CONGRESS

U.S. CONGRESSIONAL INTERNATIONAL CONSERVATION CAUCUS

ESTABLISHED: 2003

CO-CHAIRS, SENATE

- Sen. John Boozman (R-AR)
- Sen. Martin Heinrich (D-NM)
- Sen. Chris Coons (D-DE)
- Sen. Thom Tillis (R-NC)

CO-CHAIRS, HOUSE OF REPRESENTATIVES

- Rep. Henry Cuellar (D-TX)
- Rep. Betty McCollum (D-MN)
- Rep. Dave Joyce (R-OH)
- Rep. Guy Reschenthaler (R-PA)

The International Conservation Caucus was founded in 2003 with a commitment to helping the U.S. lead public and private international partnerships that provide stewardship of natural resources for habitat and biodiversity protection, poverty reduction, economic development, and regional security.

MEMBERS, SENATE

USFICA

A ONCE-IN-A-GENERATION IDEA, A NEW MODEL FOR CONSERVATION.

In December 2024, the U.S. Congress approved the establishment of the U.S. Foundation for International Conservation (USFIC), paving the way for up to \$3 billion in public and private funding over the next ten years for the long-term management of protected and conserved areas and the communities they support around the world. The bipartisan U.S. Foundation for International Conservation Act (USFICA) was championed by leaders of the International Conservation Caucus.

Bald eagle - *Haliaeetus leucocephalus*

Adobe Stock / By Giuseppe Cammino

The USFIC will provide federal grants to match private and nonfederal investments in public-private partnerships on a 1:2-basis (public:private), supporting “responsible management of designated priority primarily protected and conserved areas in eligible countries that have a high degree of biodiversity or species and ecosystems of significant ecological value.” Protected and conserved areas – widely recognized as one of the most important tools for conserving biodiversity that benefits people – often lack dedicated long-term financial support. The USFIC will aim to close this financing gap by leveraging private funding, in particular, complementing programs being implemented by other donor nations and able to augment other U.S. Government investments.

IMPACT

U.S. LEGISLATIVE ACHIEVEMENTS

A look at the policies sponsored by co-chairs and members of caucuses that ICCF supports in Washington, D.C.

U.S. FOUNDATION FOR INTERNATIONAL CONSERVATION ACT

Creates the U.S. Foundation for International Conservation to fund public-private partnerships to support local communities in managing protected and conserved areas.

THE WILDLIFE INNOVATION AND LONGEVITY DRIVER REAUTHORIZATION (WILD) ACT

Reauthorizes the Partners for Fish and Wildlife Program, which enables wildlife and habitat conservation in all 50 states and territories, and the Multinational Species Conservation Funds, which help conserve some of the world's most iconic species, including rhinos, elephants, tigers, great apes, and turtles.

TROPICAL FOREST AND CORAL REEF CONSERVATION REAUTHORIZATION ACT

Implements “debt-for-nature” swaps, whereby countries are able to redirect debt repayments to instead support the conservation of tropical forests.

DEFENDING ECONOMIC LIVELIHOODS AND THREATENED ANIMALS ACT

Promotes sustainable economic growth through trans-boundary conservation programs in the Okavango River Basin, home to Africa’s largest remaining elephant population.

THE ELIMINATE, NEUTRALIZE, AND DISRUPT WILDLIFE TRAFFICKING ACT

Creates a coordinated U.S. Government

response to combat poaching and the illegal trade in wildlife.

MULTINATIONAL SPECIES CONSERVATION FUNDS SEMIPOSTAL STAMP ACT

Releases a special stamp, the proceeds from which are transferred to the U.S. Fish and Wildlife Service (USFWS) to support species conservation programs.

LACEY ACT AMENDMENTS TO BAN ILLEGAL TIMBER IMPORTS

Amends the Lacey Act as part of the 2008 Farm Bill to combat trafficking in wildlife, fish, and plants, by expanding its protections to include a greater number of plants and plant products, specifically including products made from illegally logged wood.

CONGO BASIN FOREST PARTNERSHIP ACT

Led to \$53 million pledged, 13 new national parks formed, and tens of millions of acres dedicated to protected areas in the Congo Basin.

BLUE GLOBE ACT

Advances data collection of the Great Lakes, oceans, bays, estuaries, and coasts to accelerate technology innovation, grow the marine workforce, and develop a better understanding of the blue economy.

NATIONAL OCEAN EXPLORATION ACT

Provides statutory authority for the National Ocean Mapping, Exploration, and Characterization Council and revises

several programs at the National Oceanic and Atmospheric Administration (NOAA) that support ocean and coastal mapping, hydrographic surveys, and spatial data collection.

SOS 2.0

Improves international collaboration on marine debris research and alternative materials, and invests in the U.S. waste management recycling infrastructure; creates a foundation and trust fund to provide additional capacity for NOAA's marine debris program.

MARITIME SAFE ACT

Addresses as part of the National Defense Authorization Act (FY2020) the threat to national security from illegal, unreported,

and unregulated fishing and associated illegal activity through a whole-of-government approach.

SAVE OUR SEAS ACT

Reauthorizes the NOAA Marine Debris Program through 2022, which works to address marine debris through research, prevention, and reduction.

ILLEGAL, UNREPORTED, & UNREGULATED FISHING ENFORCEMENT ACT

Implements the Agreement on Port State Measures by advancing U.S. efforts to prevent illegally harvested fish from entering U.S. ports and markets and addresses key priorities for combating illegal, unreported, and unregulated (IUU) fishing and seafood fraud.

RATIFICATION OF 4 MULTINATIONAL OCEANS TREATIES

Protects American fishermen from being disadvantaged by illegal, unreported, and unregulated fishing.

THE ICCF U.S. CONGRESSIONAL INTERNATIONAL CONSERVATION AWARDS DINNER

The most important and exclusive gathering of conservationists from the corporate, NGO, and government communities to promote U.S. leadership in the sound management of the world's natural resources.

The 500+ guests at each year's Awards Dinner include members of the U.S. Cabinet, 100+ Members of Congress, policymakers and opinion leaders from around the globe, world business leaders, celebrities, and leaders from the international NGO community. This powerful cross-sectoral audience offers an unparalleled opportunity for guests to engage with the most important bipartisan caucuses on Capitol Hill, high-level foreign delegations, and influential business and conservation leaders.

ICCF HISTORY

BIRTH OF THE INTERNATIONAL CONSERVATION CAUCUS AND ICCF

In 2000, National Geographic Explorer and Wildlife Conservation Society Field Scientist Dr. Mike Fay completed a Mega Transect across more than 2,000 miles of Africa's Congo Basin. He gathered pledges

U.S. congressional hearing on the poaching crisis with co-chairs of the International Conservation Caucus

of support from several major conservation organizations for the establishment of protected areas and national parks in the Congo Basin, conditional upon matching support from U.S. Government grants.

Dr. Fay sought the help of his long-time friend David Barron, who had been working in Africa for many years on issues of development and democracy, to find this matching support. David pulled together a

number of the most important Democratic and Republican Members of the U.S. Congress to meet over dinner with Dr. Fay and several U.S. agency leaders to discuss what would become the historic Congo Basin Forest Partnership (CBFP).

With the support of the President of Gabon and with a \$53 million pledge from Secretary of State Colin Powell and other members of the Bush Administration, 13 new national parks were formed in the Congo Basin, resulting in tens of millions of acres dedicated to national parks and protected areas.

This project was such a great success that many of the same key Members of Congress came back together in September 2001 and decided to launch an International Conservation Caucus (ICC) in the U.S. House of Representatives and later in the U.S. Senate to work in a bipartisan fashion on other international conservation challenges and opportunities.

David was to build a foundation to support the leadership of the caucus with educational programs.

THAT FOUNDATION BECAME ICCF.

Actor and Conservationist Harrison Ford with National Geographic Explorer Mike Fay attend the first ICCF U.S. Congressional Gala, celebrating the announcement of the historic Congo Basin Forest Partnership

THE ICCF GROUP IN THE UK

THE ALL-PARTY PARLIAMENTARY GROUP ON INTERNATIONAL CONSERVATION

ICCF-UK is a registered incorporated charity with the mission to advance British leadership in international conservation through public-private partnerships and developing the next generation of parliamentary conservation leaders.

To achieve this, ICCF-UK develops cross-party coalitions in the UK Parliament to advance domestic

City of London financial district

legislation that can impact international conservation and supports collaborative working between British parliamentarians and international legislators in pursuit of common goals.

The APPG on International Conservation provides a forum to address wildlife conservation and biodiversity issues affecting our planet, including ecosystem collapse, species extinction, land degradation, invasive species, illegal fishing, and other threats to international conservation.

ICCF-UK is also the European Hub for the ICCF Group and coordinates the ICCF Group’s work related to the Commonwealth.

UK HOUSE OF PARLIAMENT

ALL-PARTY PARLIAMENTARY GROUP ON INTERNATIONAL CONSERVATION

ESTABLISHED: 2019

CO-CHAIRS

- Barry Gardiner MP
- Uma Kumaran MP
- Pippa Heylings MP
- The Rt Hon. Lord Randall of Uxbridge

ICCF-UK is the secretariat to the All-Party Parliamentary Group (APPG) on International Conservation within the Parliament of the United Kingdom of Great Britain and Northern Ireland. Together, the APPG represents a cross-party group of some of the most passionate environmental advocates in Parliament.

The APPG is committed to focusing on a wide variety of issues affecting nature and biodiversity, from biodiversity funding mechanisms to illegal wildlife trade and illegal deforestation. They also look forward to promoting British environmental leadership on the international stage.

Party Parliamentary
Group on
International
Conservation

ICCF-UK

The APPG on International Conservation provides a forum to address wildlife conservation and biodiversity issues affecting our planet, including ecosystem collapse, species extinction, land degradation, invasive species, illegal fishing, and other threats to international conservation.

ISSUES

- Conservation Finance and Financing Mechanisms
- Convention on Biological Diversity
- Nature-Based Solutions
- Illegal, Unreported, & Unregulated Fishing
- Illegal Logging, Mining, & Wildlife Trade
- Conflict & Environment
- Indigenous Resource Stewardship

ABOUT

ICCF-UK supports the leadership of the APPG by providing custom written briefings, as well as policy-neutral written briefings on parliamentary business relevant to international conservation.

Additionally, it hosts a series of workshops, seminars, fact-finding missions, and inter-caucus missions and inquiries to advance knowledge and support the priorities determined by APPG members.

Through the APPG, parliamentarians have built national cross-party coalitions and engaged with their counterparts all over the world to protect natural resources and biodiversity.

THE ICCF GROUP IN AFRICA

CONSERVATION CAUCUSES ACROSS AFRICA

The ICCF Group is working in East, Southern, and Central Africa to foster political will for conservation and support the sustainable management of natural resources. The ICCF Group has facilitated the establishment of parliamentary conservation caucuses in eleven countries and is collaborating with each of these coalitions of policymakers to strengthen governance across several key natural resource sectors. The ICCF Group coordinates high-level political engagement with expertise on conservation strategies and solutions; facilitates interactions between U.S. and international policymakers,

Landscape of Africa with warm sunset

conservation organizations, and government agencies; and seeks to leverage and integrate resources in support of sustainable natural resource management policies.

FORUMS FOR EXPERTISE AND PARTNERSHIPS

ICCF-supported caucuses enable, inform, and strengthen policymakers in their commitment to conservation. They provide a forum for a broad range of stakeholders to share expertise with policymakers and develop public-private partnerships, to strengthen and harmonize laws and policies, and to work out solutions among competing interests. Conservation caucuses link the local, national, and international levels of governance to ensure the implementation of best practices in natural resource management.

REGIONAL + TRANSFRONTIER COLLABORATION

Across Africa, ICCF-supported caucuses are engaged in regional inter-parliamentary collaboration and supporting Transfrontier Conservation Areas (TFCAs).

These have been established in Southern Africa to collaboratively manage shared natural resources across international boundaries, targeting improved regional economic development and improved biodiversity conservation.

The ICCF Group Chairman David Barron attends a regional parliamentary workshop on poaching, hosted by ICCF Kenya

ervation &
elopment
n:
cie

As parliamentarians play a critical role in the development and implementation of policies related to biodiversity conservation, natural resource management, and community development, involving them in the awareness raising process for regional challenges and in the management of TFCAs may result in the development of policies that are better aligned with the needs and aspirations of local communities and that promote sustainable development.

ICCF-supported caucuses are engaged in national and regional capacity building efforts to promote cohesion on policies looking at issues focused on environmental and biodiversity conservation and management - terrestrial and marine, plastic pollution, and the need for a circular economy.

MIOMBO

PROTECTING 1 MILLION SQUARE MILES. SUSTAINING 300 MILLION INHABITANTS.

Since 2022, the ICCF Group has been working with Angola, Congo, DRC, Botswana, Malawi, Mozambique, Namibia, Tanzania, South Africa, Zambia, and Zimbabwe to protect the Miombo Forest, an ecosystem in Southern Africa that sustains more than 300 million inhabitants through its 1 million square miles of forests and natural resources. Asked by the Government of Mozambique and on behalf of the 11 Miombo countries, the ICCF Group and its partners have identified and are driving momentum toward contributing to global efforts on the region's biodiversity conservation, protection of wildlife, reduction of carbon emissions, as well as promoting its ecosystem services to benefit livelihoods and sustainable development through several initiatives:

Stump of an African Juniper tree

Adobe Stock / By ChrWeiss

- Rob Walton Foundation's commitment to the Keystone Conservation Area Partnership within SADC that will focus on supporting existing and new protected areas through public-private partnerships to ensure long-term sustainability to benefit communities and nations, while protecting nature and natural capital.
- The Miombo Restoration Alliance, supported by a \$500 Million pledge from Trafigura, was launched during Miombo Initiative Heads of State Reception, hosted by ICCF and WCS on the sidelines of the UN General Assembly and intends to support large-scale native species restoration carbon projects in the Miombo region.
- Rainforest Trust's pledge of \$10 million to support new and conserved areas in the Miombo Woodlands.

NATIONAL ASSEMBLY, REPUBLIC OF ANGOLA

ANGOLAN PARLIAMENTARY CAUCUS FOR CONSERVATION, ENVIRONMENT, AND SUSTAINABLE ENVIRONMENT

ESTABLISHED: 2025

COORDINATOR

- José Semedo

DEPUTY COORDINATOR

- Lourdes Caposso

Comprising members of the Angolan National Assembly who coordinate efforts on conservation, sustainable development, and environmental issues to promote and propose legislation, the caucus aims to ensure compliance with national laws and oversees the implementation of bilateral agreements and international treaties related to conservation matters in Angola.

PARLIAMENT, REPUBLIC OF NAMIBIA

NAMIBIA CONSERVATION PARLIAMENTARY CAUCUS

ESTABLISHED: 2016

The Namibia Conservation Parliamentary Caucus (NACOPAC) is a multiparty collaborative of Members of the Namibian Parliament who share a commitment to improving natural resource governance as an economic development imperative. NACOPAC elevates the role that natural resource management plays in Namibia's domestic policymaking and regional development strategies. The members of this collaborative recognize that a focus on resource security and development within Parliament is vital to ensuring Namibia's continued stability and prosperity, and to addressing its wildlife, forest, fisheries, water, and energy challenges. The caucus model enables policymakers and legislators to engage one another and with non-governmental stakeholders on conservation and economic development issues in a non-political forum, and in ways that might not otherwise be possible in the formal Committee structures and Parliamentary agendas.

The Caucus is being reconstituted within the new parliament.

IMPACT

AFRICA: LEGISLATIVE ACHIEVEMENTS

Gabon

DEVELOPMENT AND PASSAGE OF THE MINING CODE

The Mining Code addresses environmental provisions associated with mining and overall provides a stronger legal framework for mining title holders, simultaneously improving traceability and transparency within the industry.

DEVELOPMENT AND PASSAGE OF THE AMENDMENT BILL TO THE PENAL CODE RELATED TO WILDLIFE OFFENSES

The new Amendments to the Penal Code included several major innovations, especially the consideration of new forms of crime and the fight against major trafficking.

Kenya

AMENDMENTS TO THE WILDLIFE CONSERVATION AND MANAGEMENT ACT

Amendments to the Wildlife Conservation and Management Act 2013, which were part of the Statute Law (Miscellaneous Amendments) Act No. 18, were passed and signed into law by H.E. Uhuru Kenyatta, President of Kenya.

Malawi

AMENDMENTS TO THE MALAWI WILDLIFE AND NATIONAL PARKS ACT

Malawi Parliament passed the Wildlife Act Amendment Bill, which introduced a maximum sentence of 30 years with no option of fine.

FORESTRY ACT AMENDMENT BILL

The National Assembly of Malawi passed the Forestry Act Amendment Bill offering a range of increased protections; increased conservation efforts with broadened management options for the government; better regulation and law enforcement; enhanced penalties and fines; and the provision of a forest development and management fund.

Mozambique

DEVELOPMENT AND PASSAGE OF AMENDMENTS TO MOZAMBIQUE'S CONSERVATION LAW

The Mozambique Parliamentary Forum on Conservation facilitated the development and passage of amendments to Mozambique's Conservation Law, raising penalties on wildlife traffickers and enabling a crackdown on high-level wildlife criminal networks.

Namibia

DEVELOPMENT AND PASSAGE OF NATURE CONSERVATION AMENDMENT ACT

The Namibian Conservation Parliamentary Caucus (NACOPAC) facilitated development and passage of the Nature Conservation Amendment Act, increasing penalties for wildlife crime.

South Africa

CONSERVATION AND SUSTAINABLE USE OF ELEPHANT, LEOPARD, LION AND RHINOCEROS

Addresses and corrects unsustainable practices by promoting the conservation, sustainable use, and wellbeing of five key species in South African wildlife.

NATIONAL ENVIRONMENTAL MANAGEMENT ACT (NEMA) AMENDMENTS

Assesses how effectively provisions are being applied, ensuring that environmental governance aligns with legislative intent and constitutional mandates.

NATIONAL ENVIRONMENTAL MANAGEMENT: BIODIVERSITY ACT (NEMBA) MONITORING

Includes reviewing policies and actions related to the conservation of threatened or protected species, the management of alien and invasive species, and the regulation of bioprospecting activities.

Tanzania

AMENDMENT OF THE ENVIRONMENTAL MANAGEMENT LAW

Amendment aimed at addressing challenges in implementing the Environmental Management Law, ensuring every sector of the economy has a 5-year strategic plan developed by local authorities and under ministerial oversight.

Zambia

DEVELOPMENT AND PASSAGE OF THE ZAMBIA WILDLIFE ACT

This Act made provisions for the management and conservation of wildlife in Zambia and saw the establishment of the Department of National Parks and Wildlife, within the then newly established Ministry of Tourism and

Arts.

DEVELOPMENT AND PASSAGE OF THE FORESTS ACT

The Forests Act provided the establishment and designation of national forests, local forests, joint forest management areas, botanical reserves, private forests and community forests. It allowed the participation of local communities, local authorities, traditional institutions, non-governmental organisations and other stakeholders in sustainable forest management. The Act established the Forest Development Fund and allowed the implementation of various international conventions.

THE ICCF GROUP IN ASIA

MARITIME ECONOMY, MARITIME SECURITY, SUSTAINABLE FISHERIES, AND GOOD NATURAL RESOURCE GOVERNANCE AND CONSERVATION

Good natural resource governance is critical to fostering economic and human development and

Bayanzag cliffs at sunset in Mongolia

Adobe Stock / By Kokhanchikov

ensuring the sustainable management of environmental resources. The ICCF Group is expanding its model of supporting parliamentary conservation and oceans caucuses throughout the ASEAN region to further the strategic priorities of legislative leaders throughout Asia, with a focus on Indonesia and Thailand as the largest economies in Southeast Asia and stewards of tremendous biodiversity and marine and terrestrial natural resources.

INDONESIA OCEANS CAUCUS PRIORITIES

FISHERIES MANAGEMENT

Indonesia has an expansive coastline whose coastal communities and export markets depend on healthy fisheries. Well managed fisheries are key to both healthy fish populations and a strong marine economy. Kaukus Kelautan works to promote multi-sectoral dialogue on the importance of effective fisheries management through a series of briefings, site visits, and parliamentary exchanges.

MARITIME SECURITY & IUU FISHING

Overlapping regulations and jurisdictions make the management and enforcement of IUU fishing more difficult than it already is. Clear, strong regulations and the synergy between stakeholders are major factors in eradicating IUU fishing and protecting Indonesia's maritime sovereignty. Kaukus Kelautan works with relevant stakeholders in an effort to formulate robust and effective maritime policies to safeguard Indonesian waters.

MARINE PROTECTED AREA GOVERNANCE

As a country with some of the greatest marine biodiversity in the world, which benefits from its

geographical position at the confluence of multiple large marine ecosystems, such as the Indonesia Sea, the South China Sea, the Gulf of Thailand, the Sulu Celebes Sea, and the Bay of Bengal, Indonesia regards its seas as its most valuable natural resources. Therefore, marine conservation for Indonesia is not an option but a mandatory way to secure prosperity from it for generations to come.

MONGOLIA CAUCUS PRIORITIES

The environmental challenges facing Mongolia require multiple stakeholders to collaborate and work together to address. One vital component is the ability for governments to understand and respond to the natural resource challenges through good governance. Within the scope of these issues, the Nature Conservation Caucus at the State Great Hural (Parliament) of Mongolia (NCC) was established on July 30, 2021 and is comprised of 12 members. The Caucus has been active in its work to improve the legal environment in support of green development and monitor and ensure the implementation of corresponding legislation.

The NCC and the ICCF Group established an official Memorandum of Understanding to cooperate on the maintenance of healthy forests, forest restoration, pasture management, combating illegal mining practices and green budgeting based on leading international nature conservation experiences.

HOUSE OF REPRESENTATIVES, REPUBLIC OF INDONESIA

KAUKUS KELAUTAN DPR RI

ESTABLISHED: 2020

LEADERSHIP

- G. Budisatrio Djiwandono
- Siti Hediati Soeharto
- Mardani Ali Sera
- Anggia Ermarini
- Irine Yusiana Roba Putri

Established in 2020, Kaukus Kelautan facilitates achieving sustainable public-private solutions for Indonesia's good natural resources governance with key focuses including but not limited to maritime economy; sound and effective fisheries management; addressing illegal, unreported, and unregulated (IUU) fishing and effective monitoring, control, and surveillance (MCS); measures to mitigate marine debris & plastics in the ocean; and supporting the conservation of coral reefs and marine biodiversity.

HEALTHY FORESTS

PRESERVING MONGOLIA'S MOST VALUABLE RESOURCE.

Since 2022, the ICCF Group has been working with the Ministry of Environment and Climate Change of Mongolia, the National Forest Agency of Mongolia, and Rio Tinto Mongolia to protect and preserve Mongolia's forest resources.

The project is working to introduce new environmentally friendly pesticides and application methods

The landscape of Northern Mongolia near the city of Erdenet

Adobe Stock / By velesovar

to combat forest pests in Mongolia, enhance the utilisation of preparations, provide guidance on assessing the effectiveness of pest control measures, share international best practices, and strengthen Mongolia's capacity in forest health.

The implementation of the 3-year project has already yielded significant results, including alleviating budgetary challenges, empowering forest health experts, raising awareness about forest pests and diseases, and establishing sustainable conditions for the ongoing research and control of these pests in the future.

THE ICCF GROUP IN LATIN AMERICA & THE EASTERN CARIBBEAN

The ICCF Group has facilitated the establishment of congressional conservation caucuses in Brazil, Chile, Colombia, Mexico, Peru, Suriname, Saint Lucia, Grenada, and of a regional conservation caucus of countries belonging to the Organization of Eastern Caribbean States (OECS).

Tropical green leaves

Adobe Stock / By ipopba

We are also working with partners in the parliaments of Antigua & Barbuda and Dominica to support the launch of conservation caucuses in these parliaments.

The ICCF Group is collaborating with each of these coalitions of policymakers to provide them with comprehensive information and innovative solutions on issues of natural resource management.

Equipped with objective information, policymakers can make informed decisions and lead the way in forming sound, nonpartisan conservation policies that benefit their respective nations.

On the ground, experts from the ICCF Group's International Conservation Corps work hand in hand with governmental and non-governmental partners in developing nations to achieve conservation priorities and develop institutional capacity to effectively manage parks and protected areas.

BRAZIL

ICCF in Brazil supports improved conservation governance by catalyzing dialogue in a multi-party parliamentary caucus. A comprehensive agenda builds capacity on sustainable development of agricultural, urban, and industrial livelihoods that have positive impacts on global biodiversity.

COLOMBIA

ICCF Colombia works with the Congress of the Republic of Colombia to strengthen political will surrounding development and conservation issues that are positioned on the legislative agenda in the Senate and House of Representatives, with more than 70 Congressmen supporting these initiatives.

Experts from the ICCF Group's International Conservation Corps are also working with the National Natural Parks of Colombia (PNN) to strengthen its management capacity, especially improving the ability to sustainably support increased tourism to bring much-needed jobs to rural communities, developing a new institutional planning system, incorporating interpretation services at heavily visited parks, strengthening commercial services management, and developing a strategy for a new national training program.

Senator Germán Blanco, co-founder and co-chair of the two conservation caucuses in the Colombian Congress, listens to panelists at an ICCF Colombia roundtable event on oceans conservation

A photograph of Deputy Marcela Guerra, Vicepresident of Mexico's Congress, speaking at a roundtable event. She is wearing a white shirt, glasses, and a watch, and is gesturing with her hands while speaking into a microphone. A man in a white shirt is visible in the background, looking towards her. The event is hosted by ICCF Mexico.

Deputy Marcela Guerra,
Vicepresident of Mexico's
Congress and founder
and co-chair of Mexico's
Conservation Caucus, giving
remarks at a roundtable
event hosted by ICCF
Mexico

 **MEXICO**

ICCF Mexico works with the General Congress of the United Mexican States acting as secretariat of the Mexican Conservation Caucus (MCC) and the Mexican Ocean Caucus from both the Senate of the Republic and the House of Representatives.

A comprehensive agenda for the new congress is under development to strengthen political will and build capacities on biodiversity conservation, communitarian forest management, sound management of natural protected areas, as well as the path towards a sustainable ocean economy, including issues such as blue carbon, IUU fishing, ocean acidification, and others.

 **CHILE**

Chile, with a coastline of 6,500 kilometers and ecosystems ranging from the Atacama Desert to the Patagonian fjords, faces key challenges in biodiversity protection, ocean governance, sustainable fishing, and climate resilience.

The 2026 establishment of the Caucus in Chile represents a strategic step toward strengthening parliamentary dialogue in one of the world's most ecologically diverse countries, which also bears significant responsibility for the Eastern Pacific.

SURINAME

Launched in the city of Paramibo on January 30, 2025 with the leadership of the National Assembly, the Suriname Conservation Caucus is the newest entry in conservation caucuses supported by the ICCF Group in Latin America and brings together businesses, NGOs, and international cooperation to gain a greater understanding of conservation issues in Suriname and the potential for change. Issues include the importance of community-led forest and integrated fire management, the scope of the Amazonia+ program and its significance for Amazonian nations, and preparations toward COP30.

EASTERN CARIBBEAN

ICCF Caribbean works toward regional integration for the sustainable management of natural resources and better quality of life for the people of the OECS through facilitating dialogue among policymakers and between parliaments. Experts from the ICCF Group's International Conservation Corps are working with Ministries to enhance capacity for protected area management in Antigua & Barbuda, Dominica, Grenada, and Saint Lucia.

- management plan for the promotion of voluntary protection agreements with private landowners in Saint Lucia.

■ ■ PERU

Peru's congressional leadership continues to choose ICCF Peru as secretariat to its nonpartisan conservation caucus, catalyzing a positive and transformative policy environment for the future of its people and the country's natural wealth.

Experts from the ICCF Group's International Conservation Corps are also working in the National Parks of Paracas and Tambopata, on interpretative scripts and interpretative training for rangers. The team also visited the Tambopata National Park, with early conversations to improve ecotourism and birdwatching.

Recent successes include a new law establishing the Day of the Peruvian Amazon and a bill in Congress to advance fishing transparency.

 **PARAGUAY**

The “Food Systems, Land Use and Restoration Project”, known as FOLUR, executed in Paraguay by the ICCF Group, seeks to promote landscape integrity and sustainable meat and soy value chains in two key biomes of Paraguay (The Chaco and the Alto Paraná Atlantic Forest (BAAPA)).

The project addresses challenges of environmental degradation in forests, livestock and agricultural areas through ecosystem restoration, improving connectivity between forests, resilience, and economic growth within the intervention areas.

Co-financed by the Global Environment Facility and civil society, FOLUR is led by the Ministry of Environment and Sustainable Development (MADES) of the Republic of Paraguay and supported by the United Nations Environment Programme (UNEP).

THE PROJECT CONSISTS OF THREE MAIN COMPONENTS:

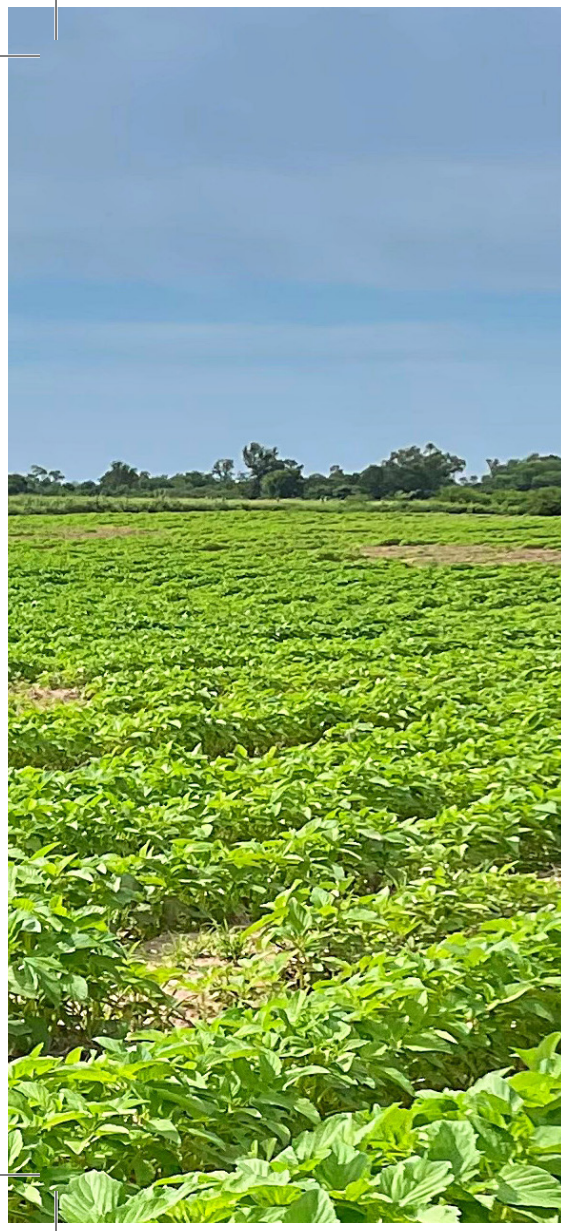

- Integrated Landscape Management System.
- Sustainable Food Production Practices and Responsible Beef and Soy Value Chains for Soybeans and Meat.
- Land Restoration and Connectivity.

Experts and producers from the Chaco participated in workshops where they established technical criteria for the preparation of a proposal for agricultural zoning in the area with the support and assistance of the FOLUR Paraguay Project

A woman wearing a tan cap with the FOLUR logo and a teal plaid shirt stands in a field of green plants. She is holding a green bag. Two children, a boy and a girl, are standing next to her. The boy is wearing a white t-shirt with colorful graphics and is giving a thumbs up. The girl is wearing a white t-shirt with 'VISION' and 'tigô' printed on it. The background shows a vast field of green plants under a blue sky with some clouds.

The FOLUR Paraguay project provides technical assistance to women in the indigenous community of Macharety in the Department of Boquerón, Chaco, and seeks to promote the sustainable management of native species to improve livestock production in the region

Another of ICCF's initiatives is the work carried out by the Group's International Conservation Corps experts in Paraguay's protected wildlife areas by providing support to the Directorate of Protected Wildlife Areas (DASP), a unit of the General Directorate of Conservation and Biodiversity Protection of the Ministry of Environment and Sustainable Development (MADES).

THE TEAM WORKS IN 4 AREAS:

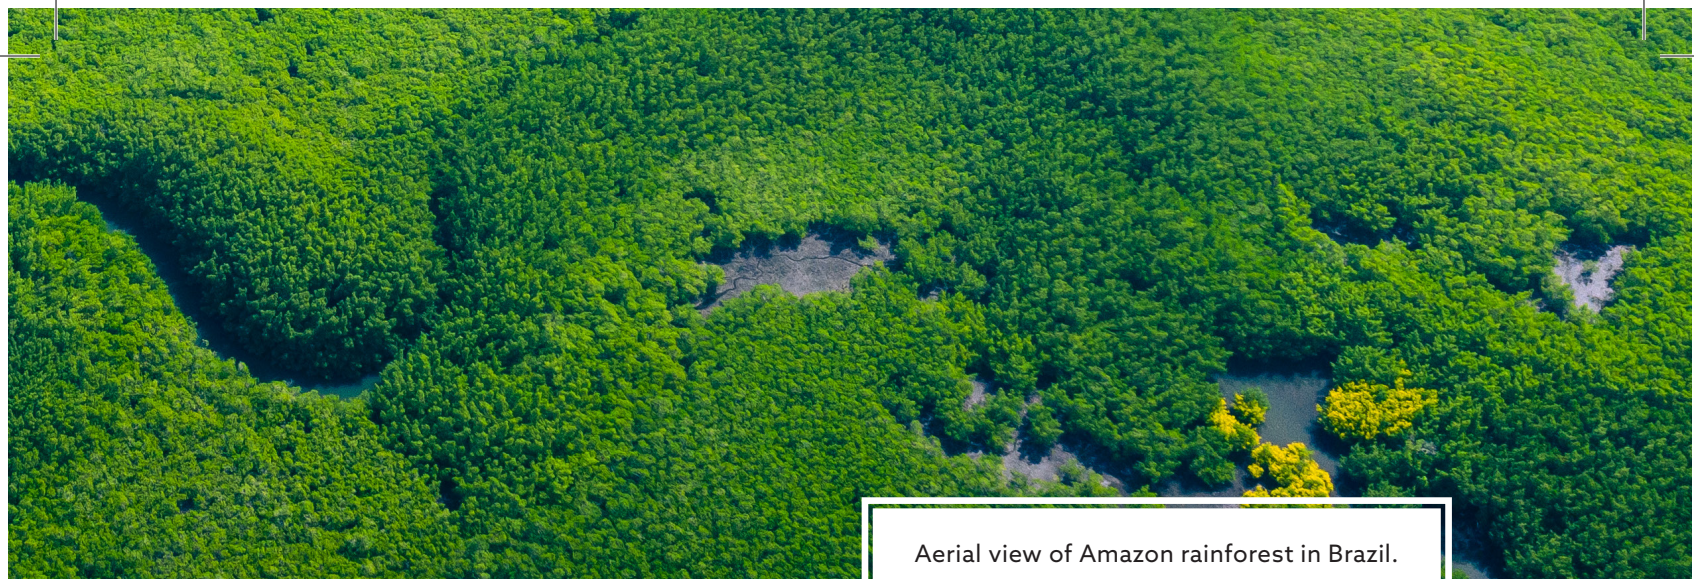

- DASP and Paraguay's Wildlife Protected Areas Brand
- Implementation Planning
- Education and Interpretation
- Training of park guards for law enforcement and visitor contact

PARLAMAZ

AN AMAZON PARLIAMENT, TO HARMONIZE POLICIES ACROSS THE BASIN.

Since 2024, the ICCF Group has been supporting leaders of the legislative caucuses it supports in Brazil, Colombia, Chile, Peru, and Suriname, to collaborate and reactivate the Amazon Parliament (PARLAMAZ), an international forum through which parliamentarians can work together to harmonize policies across the basin and ensure joint and concerted actions for the preservation of the rights of

the Amazon region and the promotion of its development.

Now led by Brazilian Senator Nelsinho Trad, co-founder and co-chair of the conservation caucus in Brazil, PARLAMAZ was launched by the *Declaration of the Amazon* to express concern over the continued loss of biodiversity in the Amazon and highlight the importance of enhancing policy coherence among Amazonian countries to promote sustainable development, preserve biodiversity, and improve the quality of life of those who inhabit the Amazon.

CONGRESS, FEDERATIVE REPUBLIC OF BRAZIL

MULTIPARTY PARLIAMENTARY GROUP FOR CONSERVATION AND SUSTAINABLE PRODUCTION OF THE CONGRESS OF THE FEDERATIVE REPUBLIC OF BRAZIL

ESTABLISHED: 2022

LEADERSHIP

- Sen. Nelsinho Trad
- Rep. Socorro neri

Established in Brasilia in 2022, the Multiparty Parliamentary Group for Conservation and Sustainable Production (*Caucus Brazil*) provides a nonpartisan forum for interparliamentary dialogues and knowledge exchange in the field of conservation and sustainability.

EASTERN CARIBBEAN CONSERVATION CAUCUSES

ESTABLISHED: 2022 - 2025

With the support of the Global Environment Facility, the ICCF Group is advancing the caucus model in the Eastern Caribbean to build high-level political consensus and close the gap between the long-term values of conservation and the short-term benefits from over-exploitation or poor management of ecosystem services and natural resources, including tourism development, IUU fishing, pollution runoff from development, and unregulated diving.

REGIONAL MEMBERS

- Carlos James - St. Vincent and the Grenadines
- Melvin M. Turnbull - British Virgin Islands
- Shawn Edwards - St. Lucia
- Cora Richardson-Hodge - Anguilla

A scenic photograph of Annandale Falls in Grenada. The waterfall is a thin, white stream of water cascading over a rocky ledge into a clear, turquoise pool. The surrounding area is lush with greenery, including large rocks covered in moss and hanging vines. A stone walkway with a metal railing is visible on the right side, where several people are standing and looking at the waterfall. The scene is brightly lit, suggesting a sunny day.
