TABLE OF CONTENTS

WHO WE ARE AND WHAT WE DO 4

The ICCF Group advances leadership in conservation by building political will among parliamentary and congressional leaders, and by supporting ministries in the management of protected areas.

WORKING WITH LEGISLATURES 8

The ICCF Group empowers hundreds of parliamentarians to strengthen a country's legislative framework in a manner that is good for the planet, economies and local communities.

- Caucuses We Support 10
- United States 12
- United Kingdom 31
- Latin America & the Caribbean 39
- Africa 63
- Asia 93

WORKING WITH MINISTRIES 103

Through the International Conservation Corps program, the ICCF Group provides expertise to help partner nations develop protected-area, wildlife management, and conservation strategies.

WHERE WE WORK

Each affiliate of the ICCF Group is established as a separate legal entity and registered in the host country. With its own Board of Directors, each entity has charitable status in its respective country. All entities are bound by a collaboration agreement that ensures a common purpose for all.

MISSION

TO ADVANCE CONSERVATION GOVERNANCE BY BUILDING POLITICAL WILL, PROVIDING ON-THE-GROUND SOLUTIONS

VISION

A WORLD WHERE PEOPLE AND NATURE SUSTAIN AND

LEFT: Russell G. Moore, Land Architect, International Conservation Corps member, drawing a sketch for technical assistance to Colombia National Parks

THE MOST ADVANCED SOLUTION IN CONSERVATION GOVERNANCE

1. WE BUILD POLITICAL WILL

The ICCF Group advances leadership in conservation by building political will among parliamentary and congressional leaders, and by supporting ministries in the management of protected areas.

2. CATALYZING CHANGE WITH KNOWLEDGE & EXPERTISE

We support political will to conserve natural resources by catalyzing strategic partnerships and knowledge sharing between policymakers and our extensive network.

3. TO PRESERVE THE WORLD'S MOST CRITICAL LANDSCAPES

Legislative outcomes, public-private partnerships, & land management demonstrate our model is a cost-effective, sustainable solution to conservation governance challenges.

THE ICCF CONSERVATION COUNCIL

Our council members offer unique perspectives and share a common desire to implement conservation projects safeguarding wildlife and biodiversity, protecting and restoring habitats, and generating economic opportunities and social benefits for surrounding communities who are necessarily the long-term stewards of local natural resources.

“IT'S THE EXPERIENCE THAT COMES FROM THOSE NGOS AND VOLUNTEERS THAT ARE ASSISTING IN THIS WIDER EFFORT TO COME UP WITH LONG-TERM SOLUTIONS THAT WILL PROTECT SPECIES FAR INTO THE FUTURE.”

-- CHAIRMAN ED ROYCE

INTERNATIONAL CONSERVATION CAUCUS FOUNDING CO-CHAIR

OUR PARTNERS

THE ICCF GROUP AND LEGISLATURES

HOW THE U.S. CAUCUS MODEL IS TRANSFORMING
CONSERVATION GOVERNANCE AROUND THE
WORLD

REACHING ACROSS THE AISLE

As an emerging organization on the global political stage, the ICCF Group is breaking ground, empowering hundreds of parliamentarians to reach across the aisle and sponsor legislation that, while covering a wide range of issues, shares a common purpose: To strengthen a country's legislative framework in a manner that isn't exclusively good for the planet, but for economies and local communities as well.

Our work to share globally a legislative model with proven results in the United States has led parliamentarians abroad to embrace a new approach to governance, one characterized by nonpartisanship and a focus on topics on which political parties can find common ground.

OUR PURPOSE IS TO SERVE

PRIORITIES ARE IDENTIFIED AND AGREED UPON BY THE PARLIAMENTARIANS. THE ICCF GROUP PROVIDES SUPPORT, GROWING THE CAUCUS WITHIN THE LEGISLATURE AND CATALYZING STRATEGIC PARTNERSHIPS AND KNOWLEDGE SHARING BETWEEN ITS POLICYMAKERS AND OUR EXTENSIVE NETWORK.

ICCF IN THE UNITED STATES

" THE MOST POPULAR CAUCUS ON CAPITOL HILL "

IN WASHINGTON, D.C., ICCF ADVANCES U.S. LEADERSHIP IN INTERNATIONAL CONSERVATION THROUGH PUBLIC AND PRIVATE PARTNERSHIPS AND DEVELOPING THE NEXT GENERATION OF CONSERVATION LEADERS IN THE U.S. CONGRESS.

INFORMING POLICY

ICCF educates and acts as secretariat to the leadership of the bipartisan U.S. Congressional International Conservation Caucus, made up of more than 1/3 of the U.S. Congress.

BUILDING POLITICAL WILL

We bring together leaders at the highest levels of government, business, and the NGO community, setting the conservation and environmental agenda by coordinating people with scientific expertise, organizations that support and manage programs on the ground, and policymakers who shape legislation.

CHAMPIONING PUBLIC-PRIVATE COLLABORATION

Through ICCF, public- and private-sector organizations collaborate and seek consensus on conservation issues and share their expertise with policymakers, providing sound, market-oriented conservation solutions with the highest standards in accountability, effectiveness, and transparency.

BIRTH OF THE INTERNATIONAL CONSERVATION CAUCUS AND ICCF

In 2000, National Geographic Explorer and Wildlife Conservation Society Field Scientist Dr. Mike Fay completed a Mega Transect across more than 2,000 miles of Africa's Congo Basin. He gathered pledges of support from several major conservation organizations for the establishment of protected areas and national parks in the Congo Basin, conditional upon matching support from U.S. Government grants. Dr. Fay sought the help of his long-time friend David Barron, who had been working in Africa for many years on issues of development and democracy, to find this matching support. David pulled together a number of the most important Democratic and Republican Members of the U.S. Congress to meet over dinner with Dr. Fay and several U.S. agency leaders to discuss what would become the historic Congo Basin Forest Partnership (CBFP). [With the support of the President of Gabon and with a \\$53 million pledge from Secretary of State Colin Powell and other members of the Bush Administration, 13 new national parks were formed in the Congo Basin](#), resulting in tens of millions of acres dedicated to national parks and protected areas. [This project was such a great success that many of the same key Members of Congress came back together in September 2001 and decided to launch an International Conservation Caucus \(ICC\) in the U.S. House of Representatives and later in the U.S. Senate to work in a bipartisan fashion on other international conservation challenges and opportunities. David was to build a foundation to support the leadership of the caucus with educational programs--that foundation became the ICCF.](#)

RIGHT: Actor Harrison Ford and Dr. Mike Fay at the ICCF Gala in Washington, D.C.

ABOUT

The International Conservation Caucus was founded in September 2001 with a commitment to helping the United States lead public and private international partnerships that provide stewardship of natural resources for habitat and biodiversity protection, poverty reduction, economic development, and regional security.

THE CAUCUS IS ONE OF THE LARGEST BIPARTISAN GROUPS IN THE U.S. CONGRESS, COMPRISED OF NEARLY ONE-THIRD OF BOTH THE HOUSE AND SENATE.

LEGISLATIVE ACHIEVEMENTS

SPONSORED BY ICC CO-CHAIRS AND MEMBERS

DEFENDING ECONOMIC LIVELIHOODS AND THREATENED ANIMALS (DELTA) ACT

Promotes sustainable economic growth through trans-boundary conservation programs in the Okavango River Basin, home to Africa's largest remaining elephant population.

TROPICAL FOREST CONSERVATION ACT REAUTHORIZATION

Implements "debt-for-nature" swaps, whereby

countries are able to redirect debt repayments to instead support the conservation of tropical forests.

THE ELIMINATE, NEUTRALIZE, AND DISRUPT (END) WILDLIFE TRAFFICKING ACT

Creates a coordinated U.S. Government response to combat poaching and the illegal trade in wildlife.

MULTINATIONAL SPECIES CONSERVATION FUNDS SEMIPOSTAL STAMP ACT

Releases a special stamp, the proceeds from which are transferred to the U.S. Fish and Wildlife Service (USFWS) to support species conservation programs.

LACEY ACT AMENDMENTS TO BAN ILLEGAL TIMBER IMPORTS

Amends the Lacey Act as part of the 2008 Farm Bill to combat trafficking in wildlife, fish, and plants, by expanding its protections to include a greater number of plants and plant products, specifically including products made from illegally logged wood.

CONGO BASIN FOREST PARTNERSHIP ACT [FOUNDATIONAL]

Led to \$53 million pledged, 13 new national parks formed, and tens of millions of acres dedicated to protected areas in the Congo Basin.

RIGHT: Senator Sheldon Whitehouse, Chairman Ed Royce, and Representative Betty McCollum, Co-Chairs of the International Conservation Caucus question witnesses during a Caucus hearing.

SOS 2.0 - PASSED SENATE IN 2020

Improves international collaboration on marine debris research and alternative materials, and invests in the U.S. waste management recycling infrastructure; creates a foundation and trust fund to provide additional capacity for NOAA's marine debris program.

MARITIME SAFE ACT NATIONAL DEFENSE AUTHORIZATION ACT (NDAA) FY 2020

Addresses the threat to national security from

illegal, unreported, and unregulated fishing and associated illegal activity through a whole-of-government approach.

BLUE GLOBE ACT - INTRODUCED IN 2019

Advances data collection of the Great Lakes, oceans, bays, estuaries, and coasts to accelerate technology innovation, grow the marine workforce, and develop a better understanding of the blue economy.

SAVE OUR SEAS ACT 2018

Reauthorizes the NOAA Marine Debris Program through 2022, which works to address marine debris through research, prevention, and reduction.

ILLEGAL, UNREPORTED, & UNREGULATED FISHING ENFORCEMENT ACT OF 2015

Implements the Agreement on Port State Measures by advancing U.S. efforts to prevent illegally harvested fish from entering U.S. ports and markets and addresses key priorities in the previous

Administration's action plan for combating illegal, unreported, and unregulated (IUU) fishing and seafood fraud.

RATIFICATION OF 4 MULTINATIONAL OCEANS TREATIES 2014

Protects American fishermen from being disadvantaged by illegal, unreported, and unregulated fishing.

THE ALL-PARTY PARLIAMENTARY GROUP ON INTERNATIONAL CONSERVATION

ICCF-UK IS A REGISTERED CHARITY IN ENGLAND AND WALES WITH A MISSION TO ADVANCE PARLIAMENTARY LEADERSHIP IN INTERNATIONAL CONSERVATION THROUGH PUBLIC-PRIVATE PARTNERSHIPS AND DEVELOPING THE NEXT GENERATION OF PARLIAMENTARY CONSERVATION LEADERS.

SINCE 2019

By equipping lawmakers with objective information and bringing together the experience of the private, philanthropy, and non-profit sectors, the ICCF-UK educates legislators to make informed decisions and lead the way in forming sound, nonpartisan, conservation policies to the benefit of global conservation. Since its establishment, ICCF-UK has built political will on international conservation issues in Africa, Asia and Latin America through a series of international and national initiatives.

MEMBERS

THE UNITED KINGDOM

HAS DESIGNATED CONSERVATION AS A KEY DOMESTIC AND FOREIGN POLICY PRIORITY, BECOMING THE FIRST OF THE G7 NATIONS TO COMMIT TO NET ZERO AND CITING NATURE BASED SOLUTIONS AS A KEY PRIORITY FOR SUCCESS AT THE GLASGOW CLIMATE SUMMIT. IT HAS ALLOCATED BILLIONS OF POUNDS TOWARDS CONSERVATION AND DEVELOPED A SUITE OF POLICIES FROM FOREST PROTECTION MEASURES TO THE CREATION AND PROMOTION OF MARINE PROTECTED AREAS AS A MEANS TO PROTECT GLOBAL BIODIVERSITY.

ICCF-UK, SECRETARIAT TO THE APPG

ICCF-UK serves as the secretariat of the APPG on International Conservation in the Parliament of the United Kingdom of Great Britain and Northern Ireland. Launched in June 2019, the APPG provides a forum to address wildlife conservation and biodiversity issues affecting our planet, including but not limited to ecosystem collapse, species extinction, land degradation, invasive species, illegal fishing, and other threats to international conservation.

ICCF-UK supports the membership of the APPG by working as an extension of their office; it provides bespoke research and knowledge for Members of the APPG through a series of workshops, seminars, fact finding missions and inter-caucus collaboration. Through the International Conservation APPG, parliamentarians have engaged with their counterparts all over the world to protect natural resources and biodiversity.

APPG PRIORITIES

**INQUIRY INTO WILDLIFE, COVID-19 AND
PREVENTING FUTURE PANDEMICS**

**CONSERVATION FINANCE AND FINANCING
MECHANISMS**

CONVENTION ON BIOLOGICAL DIVERSITY

**NATURE BASED SOLUTIONS AND THE ROAD TO
GLASGOW**

THE BLUE ECONOMY

ILLEGAL LOGGING AND MINING

HABITAT RESTORATION

PLASTICS AND WASTE

DEVELOPING OPPORTUNITIES FOR

**INTERNATIONAL COLLABORATION THROUGH
THE ICCF'S GLOBAL NETWORK OF CAUCUSES**

ICCF-UK ALSO IDENTIFIES AND ESTABLISHES VALUES-BASED RELATIONSHIPS WITH FUTURE CONSERVATION LEADERS IN PARLIAMENT

Alumni of the APPG that have gone on to hold Ministerial positions include The Rt Hon Lord Goldsmith of Richmond Park (co-founder of the APPG and Minister for Pacific and the Environment at the Foreign, Commonwealth & Development Office (FCDO) and the Department for Environment, Food and Rural Affairs (Defra) - and Alex Chalk (former co-chair and Parliamentary Under Secretary of State in the Ministry of Justice).

THE ICCF GROUP IN LATIN AMERICA

SOLUTIONS IN CONGRESS AND IN THE FIELD

THE ICCF GROUP IS WORKING IN GOVERNMENTS AND ON THE GROUND IN LATIN AMERICA AND THE CARIBBEAN TO ADVANCE LEADERSHIP AND BUILD CAPACITY TO MANAGE NATURAL RESOURCES, INCLUDING IN PARKS AND PROTECTED AREAS.

CONSERVATION CAUCUSES ACROSS LATIN AMERICA

The ICCF Group has facilitated the establishment of congressional conservation caucuses in Brazil, Colombia, Peru, and Mexico and is working with partners in the parliaments of Antigua & Barbuda, Dominica, Grenada, and Saint Lucia to support the launch of conservation caucuses in these parliaments, collaborating with each of these coalitions of policymakers to provide them with comprehensive information and innovative solutions on issues of natural resource management. Equipped with objective information, these Members of Congress can make informed decisions and lead the way in forming sound, nonpartisan conservation policies that benefit their respective nations.

ABOVE: HR. German Blanco, Co-Chair, Colombia Conservation and Oceans Caucus, and House Speaker 2020 - 2021

ON THE GROUND, EXPERTS FROM THE ICCF GROUP'S INTERNATIONAL CONSERVATION CORPS WORK HAND IN HAND WITH GOVERNMENTAL AND NON-GOVERNMENTAL PARTNERS IN DEVELOPING NATIONS TO ACHIEVE CONSERVATION PRIORITIES AND DEVELOP INSTITUTIONAL CAPACITY TO EFFECTIVELY MANAGE PARKS AND PROTECTED AREAS.

COLOMBIA

The International Conservation Corps team members are working with the National Natural Parks of Colombia

(PNN) to strengthen its management capacity, especially improving the ability to sustainably support increased tourism to bring much-needed jobs to rural communities; developing a new institutional planning system; incorporating interpretation services at heavily visited parks; strengthening commercial services management; and developing a strategy for a new national training program.

PERU

Having demonstrated successful work with PNN, the ICCF Group has signed a memorandum of understanding to work with SERNANP - the National Parks Service in Peru - and identified key areas for collaboration in which the ICCF program can support Peru through expert technical assistance.

EASTERN CARIBBEAN

In the Eastern Caribbean, the International Conservation Corps is working with relevant Ministries in target countries to enhance capacity for protected area management in Antigua & Barbuda, Dominica, Grenada, and Saint Lucia. This includes ongoing work to update the management plan and draft an associated implementation plan for Codrington Lagoon National Park in Antigua & Barbuda, a business plan for Dominica's Cabrits National Park, a co-management agreement between the Fisheries Division and a third-party coalition of stakeholders in Grenada's Grand Anse Marine Protected Area (MPA), and supporting the Ministry of Sustainable Development in Saint Lucia to promote Voluntary Protection Agreements with private landowners through a management plan for a private estate.

COLOMBIAN CAUCUS PRIORITIES

FOREST ISSUES

According to the Food and Agriculture Organization of the U.N. (FAO), 54.5% or about 60,499,000 ha of Colombia is forested. Of this, 14.1% (8,543,000 ha) is classified as primary forest, the most biodiverse and carbon-dense form of forest. Colombia also has 405,000 ha of managed, planted forests. Deforestation remains a serious problem in the Andes and the Amazon basin. ICCF activities in support of the Caucus have stressed forest issues, including a binational legislative forestry summit with Mexican congressmen and expert presentations about forest management in the legislative training sessions held in 2020.

NATIONAL PARKS

Improving management of its National Parks is a priority for Colombia. The Colombian Conservation Caucus is working to assess and address the challenges facing the national parks system in order to promote ecotourism activities in important areas around the country. Part of this effort includes securing sustainable financing for Colombia's National Parks.

WATER

Recognizing water as an axis of sustainable development, the Conservation Caucus is looking at water-related topics like water quality, groundwater management, sustainable use, access to potable water, sanitation, wastewater pollution, and drought.

WASTE MANAGEMENT

Colombia has advanced in the implementation of the National Strategy of the Circular Economy that promotes productive transformation to maximize the added value of production and consumption systems in economic, environmental, and social terms, based on the more efficient use of resources, value, and closing cycles. Among the challenges faced under this strategy is the management of containers and packaging. Colombia has gained experience in the collection of these materials, and it is worth noting the important contributions of the Colombian Conservation Caucus, which has introduced and promoted the law banning plastic bags in Isle of San Andres and bills to support the implementation of this strategy. However, it remains necessary to expand the installed capacity for recycling containers and packaging by at least four times in Colombia by 2030 in order to take advantage of the generated materials as well as create opportunities for jobs, businesses, and greater productivity, involving the accelerated implementation of this strategy.

ENVIRONMENTAL EDUCATION

The National Government has among its goals the inclusion of environmental education both formally and informally / non-formally as a contribution to sustainable development and the improvement of the quality of life of Colombians, conserving their natural wealth and recovering ecosystems for the sake of the next generations. Under this purpose, the Conservation Caucus, through multi-sectoral dialogues, is seeking initiatives that contribute to the implementation and strengthening of the strategies of the National Environmental Education Policy.

THUMBNAIL (RIGHT): Planning workshop 2015. Conscorp technical assistance to Colombia National Parks

ILLEGAL MINING

Conservation Caucus legislative initiatives have focused on the promotion of responsible mining practices, including formalization, fighting against illegal mining, and suppressing the use of mercury. Caucus leadership spearheaded efforts in Congress which led to Colombia's formal accession to the Minamata Convention on Mercury.

BANNER (ABOVE): Oceans Roundtable, with Captain William Pedroza, Director of Maritime and River Interests of the National Navy, Caucus Member HR. Elizabeth Jay-pang Díaz, and Captain Juan Camilo Forero Hauzeur, Executive Secretary of the Colombian Ocean Commission.

RIGHT: IUU Fishing Roundtable (2018)

COLOMBIAN OCEANS CAUCUS PRIORITIES

FISHERIES MANAGEMENT

Colombia is the only country in South America with extensive marine-coastal territories in both the Atlantic and Pacific Oceans. Fishing in these oceans is, for coastal communities, a primary income- and employment-generating activity. However, illegal fishing has become a challenge that affects the benefits generated by this activity. Illegal fishing also impacts national security with links to smuggling of fuel and illicit trafficking in gold. The Colombian Oceans Caucus is beginning discussion of this topic through a series of multisectoral dialogues that will be developed in the Congress of the Republic and through a field mission to the Utria National Park in the Pacific Region. Through these activities, caucus members hope to gain a comprehensive understanding of the challenges and opportunities that fisheries generate and to understand the role they can play as legislators to promote initiatives that will lead to effective solutions.

CORAL REEF RESTORATION

With the beginning of the UN Decade for Ecosystem Restoration (2021-2030) and Ocean Sciences for Sustainable Development (2021-2030), one of the key issues is the restoration of coral reefs as a strategy to improve their ecosystems services, such as food, coastal protection, tourism, and fishing, among others and also contribute to the reduction of the main threats that affect them with overfishing, pollution, deficient practices of coastal development, and climate change. Colombia is developing one of the largest initiatives in the region for the restoration of this ecosystem, especially in the Archipelago of San Andrés,

also in response to the impact of Hurricanes Eta and Iota, which significantly destroyed the two smaller islands' infrastructure and coral reefs. Although the environmental authority is working diligently with NGOs and communities to restore it with Operation Black Crab, the effectiveness of its efforts is threatened if these are not increased and enhanced to meet the demand and the risks of climate change threats. This is an issue where the Oceans Caucus is involved actively in finding initiatives for its restoration, through national dialogue and field missions to foster these strategies as a key element for economic reactivation involving the local governments, communities, and international support.

ECOTOURISM

Colombia continues to be an important destination for international tourism. In 2016, the country received 5,092,052 international visitors, the highest figure in the country's tourism history, far surpassing country goals. Tourism is currently the second largest income generator in the country, reaching US \$5.251 million in 2015, 7.45% higher than the previous year. With this growth in tourism, there are numerous opportunities to enhance tourism in Colombia's national parks as a strategic economic sector of the country. Ecotourism can generate social, environmental, and economic benefits that will allow the country's protected areas to be developed in a sustainable manner. The Colombian Conservation Caucus and Oceans Caucus are endeavoring to assess these opportunities by carrying out field missions and seeing first-hand how legislators can play a role in promoting nature tourism once the COVID crisis is resolved.

MEXICO CAUCUS PRIORITIES

SUSTAINABLE FORESTRY

Community forest management, including both the conservation and the sustainable use of forest ecosystems, is essential for the development of the nation, especially to improve the living conditions of the people who inhabit the forest communities. An important part of the work of the Mexican Conservation Parliamentary Group in this area has focused on the promotion of multisectoral dialogues to identify proposals for improvement of public policies and legislation to ensure the promotion of sustainable forest management, community rights, and compliance with the biodiversity and sustainable development goals that the country has acquired under various international and national frameworks.

PROTECTED AREA MANAGEMENT

Mexico has 182 federal natural protected areas that represent 90,839,521.55 hectares. These areas conserve the most representative ecosystems of the country and their biodiversity, protect the country's main hydrological basins, provide raw materials, and harmoniously promote the integration of communities and nature to promote long-term sustainable development. Despite having a strong parks system, the country has recognized the need to improve its management and financing. The Mexican Conservation Parliamentary Group provides a forum for multi-sectoral dialogue to support the strengthening of national parks through public-private partnerships and to promote innovative schemes that integrate communities in conservation activities.

BIODIVERSITY

Although Mexico represents only 1% of the earth's surface, it houses around 12% of the world's biodiversity and a large number of endemic species. The Mexican Conservation Parliamentary Group works to promote the conservation and sustainable use of the country's biodiversity, addressing issues such as the illegal trafficking of species, the conservation of habitats, the application of CITES, the role of communities in the conservation of biodiversity, and the strengthening of legislation and policies on the matter.

RIGHT: DIP. IRMA JUAN CARLOS, CO-CHAIR

SPOTLIGHT: MEXICO

MISSION SHEDS LIGHT ON COMMUNITY FORESTRY

The ICCF Group is collaborating with Mexico's National Forest Commission (CONAFOR) to promote sustainable development of Mexico's forests and jungles, with a focus on community management. In 2018, the ICCF Group led a field mission to the state of Durango with key legislators to see firsthand the contributions of community forest companies toward biodiversity and sustainable development.

Not long after, the Mexican House of Representatives approved amendments to the General Law of Sustainable Forestry Development, which include the creation of a Community Forestry Management Program. A number of Congressmen were involved in drafting and editing the bill including GPCM members, who advocated for community forest management on the Senate floor.

“ THE MISSION ALLOWED ME TO EXPERIENCE THE WORK THAT FOREST COMMUNITIES IN MEXICO DO TO CONSERVE NATURAL RESOURCES AS VALUABLE AND AT THE SAME TIME GENERATING SOCIAL WELL-BEING. IT IS FUNDAMENTAL THAT WE CONTINUE STRENGTHENING THE LEGAL FRAMEWORK ON THE SUBJECT OF FORESTS AND LOOK FOR INCENTIVES FOR THESE COMMUNITIES' WORK.”

-- HR. Irma Juan Carlos, Co-Chair of the Mexican Conservation Parliamentary Group

THE ICCF GROUP IN THE CARIBBEAN

SOLUTIONS IN PARLIAMENT AND IN THE FIELD

THE CARIBBEAN PROGRAM SUPPORTS THE FORMATION OF NATIONAL-LEVEL CONSERVATION CAUCUSES IN THE PARLIAMENTS OF ANTIGUA & BARBUDA, DOMINICA, GRENADA, AND SAINT LUCIA, COLLABORATING WITH EACH OF THESE NONPARTISAN COALITIONS OF POLICYMAKERS TO SUPPORT THEIR AGENDAS REGARDING CONSERVATION AND SUSTAINABLE

DEVELOPMENT.

The program convenes stakeholders and creates a platform for dialogue on conservation issues, supporting Members of Parliament to make informed decisions and lead the way in forming sound, nonpartisan, sustainable development policies that benefit their respective nations, and the region as a whole.

In the field, the International Conservation Corps is working with relevant Ministries in Antigua & Barbuda, Dominica, Grenada, Saint Lucia, the Bahamas, and St. Kitts and Nevis to enhance capacity for protected areas management. This includes ongoing work to update the management plan and draft an associated implementation plan for Codrington Lagoon National Park in Antigua & Barbuda, a business plan for Dominica's Cabrits National Park, a co-management agreement between the Fisheries Division and a third-party coalition of stakeholders in Grenada's Grand Anse Marine Protected Area (MPA), and supporting the Ministry of Sustainable Development in Saint Lucia to promote Voluntary Protection Agreements with private landowners through a management plan for a private estate.

LEGISLATIVE ACHIEVEMENTS

LED BY CAUCUS CO-CHAIRS AND MEMBERS IN LATIN AMERICA

COLOMBIA

APPROVAL OF 2013 MINAMATA CONVENTION ON MERCURY

Led to Colombia's formal accession to the Minamata Convention on Mercury.

LAW PASSED FOR THE PROTECTION OF ANDEAN HIGHLANDS (PÁRAMOS)

Regulates activities in and around the Andean highlands for the restoration and sustainable use of these integral ecosystems.

POLICE CODE TO FIGHT USE OF MERCURY IN ILLEGAL GOLD MINING

Prohibits the use of chemical substances in the irregular removal of minerals.

PLASTIC BAGS BAN, ISLE OF SAN ANDRES

Phases out single-use plastics in the Colombian archipelago by the year 2021.

KIGALI AMENDMENT TO THE MONTREAL PROTOCOL

Adds the 5th modification to the Montreal Protocol for ozone layer to regain 1980 level by 2050.

APPROVAL OF THE GLOBAL GREEN GROWTH INITIATIVE (GGGI) PROJECT

The Global Institute for Green Growth is established in Colombia as an international organization.

MEXICO

GENERAL LAW OF SUSTAINABLE FORESTRY DEVELOPMENT OF 2018

Improves the forestry sector by mainstreaming biodiversity; adopts environmental and social safeguards system; improves mechanisms for civil participation in decision-making processes; and adopts measures to increase the sustainable production of the sector, among others.

PERU

BILL SIGNED INTO LAW TO REGULATE SINGLE-USE PLASTICS NATIONWIDE

Regulates the manufacturing, importing, distribution, and consumption of single-use plastics such as bags, straws, and polystyrene, among others, in order to protect both the environment and human health.

CLIMATE CHANGE LEGISLATION

Establishes the principles, approaches, and general provisions to coordinate, articulate, design, execute, report, monitor, evaluate, and disseminate public policies for the comprehensive, participatory, and transparent management of adaptation measures and mitigation to climate change, in order to reduce the country's vulnerability, take advantage of the opportunities of low-carbon growth, and comply with international commitments.

RIGHT: HR. German Blanco

THE ICCF GROUP IN AFRICA

EMPOWERING POLICYMAKERS AND THE JUDICIARY

THE ICCF GROUP IS WORKING IN EAST, SOUTHERN, AND CENTRAL AFRICA TO FOSTER POLITICAL WILL FOR CONSERVATION AND SUPPORT THE

SUSTAINABLE MANAGEMENT OF NATURAL RESOURCES.

CONSERVATION CAUCUSES ACROSS AFRICA

The ICCF Group has facilitated the establishment of parliamentary conservation caucuses in ten countries and is collaborating with each of these coalitions of policymakers to strengthen governance across several key natural resource sectors. The ICCF Group coordinates high-level political engagement with expertise on conservation strategies and solutions; facilitates interactions between U.S. and international policymakers, conservation organizations, and government agencies; and seeks to leverage and integrate resources in support of sustainable natural resource management policies.

FORUMS FOR EXPERTISE AND PARTNERSHIPS

ICCF-supported caucuses enable, inform, and strengthen policymakers in their commitment to conservation. They provide a forum for a broad range of stakeholders to share expertise with policymakers and develop public-private partnerships, to strengthen and harmonize laws and policies, and to work out solutions among competing interests. Conservation caucuses link the local, national, and international levels of governance to ensure the implementation of best practices in natural resource management.

CAPACITY BUILDING

The ICCF Group is also leveraging its relationships and the expertise of partners to strengthen the capacity of prosecution authorities and the judiciary across Sub-Saharan Africa to successfully handle wildlife crime cases. To this end, the ICCF Group has convened a series of workshops with judges, prosecutors, local magistrates, and customs and law enforcement agents to develop country-specific “road maps” for implementing operating procedures for criminal justice institutions with political buy-in and support.

ABOUT

The BOCOPAC strategic objectives have recognized the importance of ecotourism development, combating environmental crime, and the promotion of community-based conservation. The caucus' goals involve the development and passage of national wildlife policy and legislative actions, implementation of regional policy frameworks, and continued development of criminal justice capacity-building.

ESTABLISHED IN 2016, THE BOCOPAC IS ONE OF THE YOUNGEST CAUCUSES IN AFRICA.

BOTSWANA CAUCUS PRIORITIES

ECOTOURISM DEVELOPMENT

BOCOPAC's strategic objectives recognize that biodiversity is crucial for sustainable tourism development throughout the land. The caucus aims to review the legal framework for the protection and sustainable management of Botswana's natural resources and natural capital, prioritizing the examination of legal protections of endangered and/or protected wildlife species in order to facilitate good governance in the management of National Parks, game management areas, and other wild spaces.

ENVIRONMENTAL CRIME

Environmental crime is an increasing challenge for Botswana. To ensure that law enforcement, prosecution authorities, and customs officials can effectively investigate and prosecute illegal trade of wildlife, forest, and fisheries products within Botswana's borders, BOCOPAC is working to ensure that legislation and policy apply the strongest standards for combating environmental crimes.

COMMUNITY-BASED CONSERVATION

BOCOPAC is focusing on promoting national sustainable development goals in order to improve livelihoods. BOCOPAC members recognize that (i) conservation and economic development go hand-in-hand and (ii) when local communities take ownership of natural resources, they have a vested interest in promoting wise resource utilization. To this end, BOCOPAC looks to incorporate local communities into Botswana's wildlife management framework.

ABOUT

Since 2012, ensuring Kenya maintains a balance between economic development and conservation has remained a priority for the PCC-K. Leadership has prioritized the harmonization of wildlife, water management, forestry, and fisheries laws.

IN 2019, THE CAUCUS-BACKED AMENDMENTS TO THE WILDLIFE CONSERVATION AND MANAGEMENT ACT, INCREASING PENALTIES FOR WILDLIFE CRIMES, WERE SIGNED INTO LAW.

KENYA CAUCUS PRIORITIES

WILDLIFE TRAFFICKING

In 2013, members of the PCC-K led efforts to include stiff penalties for convicted poachers and traffickers in the National Wildlife Conservation and Management Act of 2013. Still, cases related to wildlife crimes continued to be characterized by judicial process delays and, if and when sentences were handed down, they were often contrary to the legislation. The PCC-K continued analyzing the challenges faced by the judiciary related to sentencing and brought

to Parliament an Amendment Bill to the 2013 Act. In 2019, Parliament approved amendments to the National Wildlife Conservation and Management Act of 2013, and the President of Kenya signed them into law on January 4, 2019.

ILLEGAL LOGGING

In Kenya, illegal logging is widespread in the country, for both timber and charcoal production. The PCC-K is committed to increasing cooperation among government leaders in order to tackle the illegal trade in the region. Following the findings of a task force, which toured the country speaking with Kenyans about forest management and illegal logging, members of the PCC-K discussed the results of the investigative report. The PCC-K will continue to lead discussion as Parliament considers policy solutions to address this growing issue.

POLLUTION

Ensuring Kenya maintains a balance between economic development and conservation remains a priority for the PCC-K. Issues central to this discussion are air and water pollution, especially chemical runoff. The effects of industrial pollution are felt not only in the major cities, but also in urban and rural areas across the country. Caucus members are actively involved in identifying solutions to these environmental challenges, working to bring together government leaders and relevant stakeholders to discuss the pollution risks in communities and consider how environmental policies can be improved.

ABOUT

THE MPCC IS COMMITTED TO DRIVING MALAWI'S ECONOMIC DEVELOPMENT AND LEADERSHIP IN THE REGION THROUGH THE IMPLEMENTATION OF SUSTAINABLE NATURAL RESOURCE MANAGEMENT STRATEGIES AND STRONG CONSERVATION FRAMEWORKS BY ENSURING THAT NATURAL RESOURCE GOVERNANCE FRAMEWORKS ARE STRENGTHENED, ENFORCED, AND DEVELOPED TO BENEFIT MALAWI'S PEOPLE, ECONOMIC GROWTH, AND ENVIRONMENT.

THE FOREST ACT AMENDMENT BILL

On February 13, 2020, the National Assembly of Malawi passed the Forestry Act Amendment Bill of 2019 – a critical turning point for environmental protection in Malawi. This milestone was a long time coming, given that the Forestry Act was last updated in 1997. The new Act offers a range of increased protections, such as better regulation of charcoal; increased transparency and accountability in the Forestry Sector; increased conservation efforts with broadened management options for the government; better regulation and law enforcement; enhanced penalties and fines; and the provision of forest development and management fund.

Prior to the passage of the Forestry Act Amendment Bill of 2019, the Malawi Parliamentary Conservation Caucus (MPCC) held several national consultation workshops to facilitate inter-agency collaboration and secure support for the amendments, which had been on hold for five years. These productive meetings helped to open up channels of communication between the private sector and relevant government departments. In terms of enforcement of legal measures, the consensus was much was being done to take wildlife crime seriously, while forestry crime was being overlooked. The MPCC-led meetings brought forward challenges facing legal practitioners on the ground and strengthened coordination between the Anti-Corruption Bureau and the wildlife and forestry departments. As a result, amendments were passed with resounding support and the MPCC continues to work to ensure that the provisions in the bill translate into real protection for Malawi's forests.

ABOUT

The MPFC addresses a wide array of issues including wildlife trafficking, deforestation, sustainable development, and marine protected areas.

THE MPFC HAS SPONSORED AMENDMENTS TO RAISE PENALTIES ON WILDLIFE TRAFFICKERS, AS WELL AS THE SIGNING OF THE BILATERAL AGREEMENT WITH TANZANIA ON THE COORDINATED CONSERVATION AND MANAGEMENT OF THE NIASSA-SELOUS ECOSYSTEM.

MOZAMBIQUE CAUCUS PRIORITIES

WILDLIFE TRAFFICKING

As the wildlife population of Mozambique continues to decline due to poaching and trafficking, the Mozambique Parliamentary Forum on Conservation (MPFC) recognizes the need to take action. In 2017, Parliament passed an Amendment to the 2014 Conservation Law, increasing the penalties for wildlife crime. However, the MPFC acknowledges the existing gaps within the legal and judicial framework and understands that joint efforts are required to efficiently prosecute wildlife crimes. Moreover, magistrates require more skills and education on wildlife crime management to efficiently handle cases and implement existing conservation laws. Therefore, part of the parliamentary forum's agenda has included bringing together magistrates and officials along with wildlife crime experts to discuss potential solutions to the challenges that hinder wildlife-related prosecutions in the country.

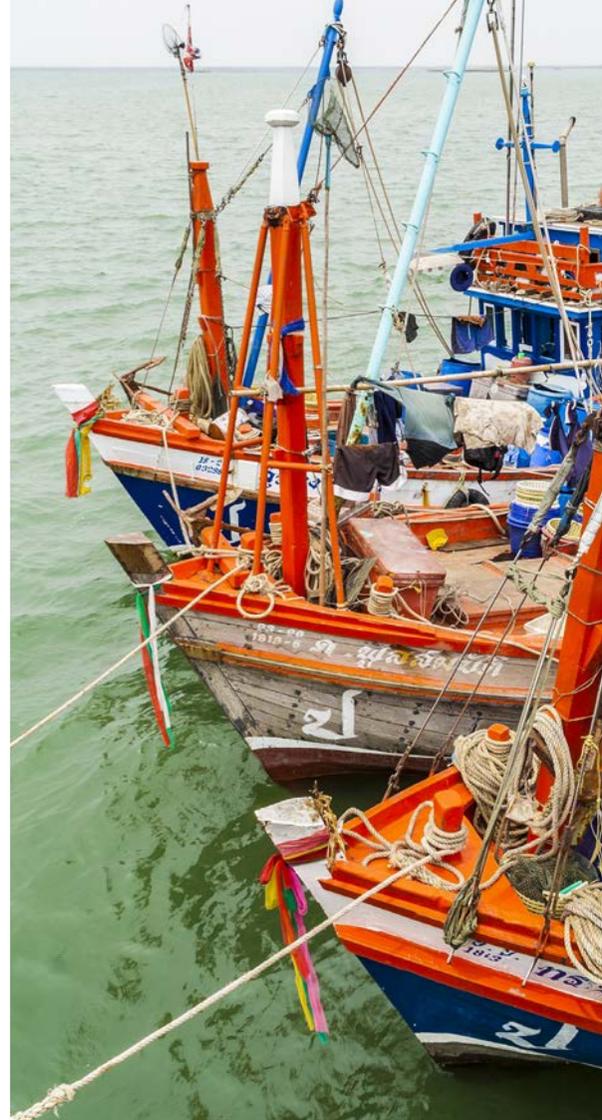

ILLEGAL LOGGING

Believing the illegal export of timber from Mozambique to be leading to rapid deforestation, the Government took steps to improve cooperation among law enforcement agencies. The MPFC supported the tax updates on raw timber exports in 2017 as an effort to combat the illegal trade of timber. Moreover, the Government is currently revising the Forest Law, and the MPFC is supporting its development.

FISHERIES MANAGEMENT

Mozambique has 2,515 km of coastline rich in hydrocarbons and other marine resources such as shrimp and tuna. To properly capitalize on and protect these resources, the Government has taken steps to acknowledge the importance of its maritime domain, and the MPFC has recognized the need for capacity building in terms of the management and enforcement of this domain. Improving maritime enforcement will also help Mozambique to combat illegal fishing.

ZAMBIA CAUCUS PRIORITIES

BIODIVERSITY & WETLANDS

Responsibility for the management of biodiversity and wetlands is shared among a number of departments and ministries in Zambia. The implications of such a decentralized framework manifest themselves in a lack of institutional clarity and in other policy and legal issues surrounding biodiversity and wetlands, requiring urgent attention. To address this challenge, the ZPCC is working to develop a national wetlands management policy.

WILDLIFE AND PROTECTED AREAS

Some aspects of Zambia's legal framework for managing protected areas are outdated. ZPCC members recognize that costly institutional arrangements require an urgent reorientation to promote private-sector participation. The ZPCC is currently focusing on incorporating new models of protected area management and promoting community stewardship of natural resources. Part of this effort involves considerations to revise the 1998 Wildlife Act.

FORESTRY

The 1999 Forest Act, though passed through parliament, was never enacted by the government. Rather, the government backtracked on its decision to establish an autonomous Forest Commission. New forestry-related opportunities that have yielded good results elsewhere in the world include carbon markets, community forestry, and public-private partnerships. So as not to miss out on these opportunities, the ZPCC will look to address weaknesses in forestry governance. The ZPCC has reviewed policy & legislation that would enable Zambians to benefit from new market-based incentives in the forestry sector.

LEGISLATIVE ACHIEVEMENTS

LED BY CAUCUS CO-CHAIRS AND MEMBERS IN AFRICA

INDONESIA CAUCUS PRIORITIES

FISHERIES MANAGEMENT

Indonesia has an expansive coastline whose coastal communities and export markets depend on healthy fisheries. Well managed fisheries are key to both healthy fish populations and a strong marine economy. Kaukus Kelautan works to promote multi-sectoral dialogue on the importance of effective fisheries management through a series of briefings, site visits, and parliamentary exchanges.

MARITIME SECURITY & IUU FISHING

Indonesia's strategic geographic area places Indonesia in an important role as a center of gravity for the Indo-Pacific region. IUU fishing has long been a major issue that not only impacts Indonesia's marine environment, but their economic and regional stability. Overlapping regulations and jurisdictions make the management and enforcement of IUU fishing more difficult than it already is. Clear, strong regulations and the synergy between stakeholders are major factors in eradicating IUU fishing and protecting Indonesia's maritime sovereignty. Kaukus Kelautan works with relevant stakeholders in an effort to formulate robust and effective maritime policies to safeguard Indonesian waters.

MARINE PROTECTED AREA GOVERNANCE

As a country with one of the world's largest marine biodiversity benefited from its geographical position at the confluence of multiple large marine ecosystems, such as Indonesia Sea, the South China Sea, the

Gulf of Thailand, the Sulu Celebes Sea, and the Bay of Bengal, Indonesia regards its seas as its most valuable natural resources. Therefore, marine conservation for Indonesia is not simply an option but mandatory as to secure prosperity from it for generations to come. ICCF Indonesia supports the Kaukus Kelautan and its efforts to strengthen Marine Protected Area governance and coastal ecotourism domestically and regionally through a series of multilateral discussions, stakeholder briefings, and parliamentary exchanges.

RIGHT: Chairman Sudin (left), Deputy Speaker Hon. Azis Syamsuddin (right)

SPOTLIGHT: INDONESIA HARMONIZATION OF THE KSDAHE BILL

The Legislative Committee of the DPR RI (Baleg DPR RI) approved the harmonization of the revision of Law Number 5 of 1990 concerning Conservation of Biological Natural Resources and Their Ecosystems (UU KSDAHE). The revisions prescribe sanctions for perpetrators of criminal acts causing environmental destruction, seek to incentivize regions to house parks and protected areas, and provide awareness that the GDP of protected forest areas is much higher than that of the sector that destroys forests.

ABOUT

IN FEBRUARY 2020, THE SENATE CONSERVATION CAUCUS WAS LAUNCHED IN BANGKOK WITH ICCF ACTING AS THE OFFICIAL SECRETARIAT

Senator General Surasak Karnjanarat serves as the Founding Chairman of the new caucus, which comprises 22 Senators and is committed to working toward the good management of Thailand's terrestrial and marine natural resources. The caucus leadership shares the common belief that their country's ancestors have preserved Thailand's natural resources for the benefit of people, and that everyone should work together in a collaborative fashion to ensure that future generations are able to benefit from Thailand's tremendous natural heritage. In particular, there is every reason why the government, private sector, and civil society should work with each other and with other stakeholders to strengthen the sustainable management of national parks and natural resources.

THAILAND CAUCUS PRIORITIES

NATIONAL PARKS MANAGEMENT

Situated between two major biogeographical regions, the Indochinese region in the north and the Sundiac region in the south, Thailand's expansive coastlines, varied topography, and range of climates make it one of the most biodiverse countries in Southeast Asia and the world. Its unique biodiversity is supported by a wide variety of ecosystems and habitats, many of which are significantly threatened by human activities like deforestation, pollution, and large increases in tourism. Thailand recognizes the importance of protecting ecosystems and the services they provide. Currently, there are over 100 national parks in Thailand with many in the process of establishment. Strengthening the management of national parks and natural resources through the SCC is therefore critical for the future benefit of people and nature.

IUU FISHING

Illegal, unreported and unregulated (IUU) fishing is a global issue. As one of the world's largest seafood exporters, Thailand takes its responsibility to tackle this challenge very seriously. In accordance with international commitments, the country has pushed for a major upgrade of fisheries governance and enforced tough reforms to eradicate IUU. It has committed to an "IUU-Free Thailand" meaning fish and fisheries products imported into or exported from Thailand will not come from IUU activities nor infiltrate supply chains. The Thai fisheries sector is vital for the social and economic prosperity of the country, and the government has introduced several measures to improve the welfare of local fishermen impacted by new IUU regulations. SCC works with concerned stakeholders to formulate and uphold policies aimed at

maintaining a sustainable and ethical fishing industry.

COASTAL EROSION

With roughly 3,000 kilometers of coastline, coastal erosion is a serious problem for Thailand. Its coasts border the Andaman Sea in the west and the Gulf of Thailand in the east. Coastal erosion in Thailand is caused by several factors such as decreasing mangrove forest areas, overpumping of groundwater in metropolitan areas, tourism and large-scale development projects, decreasing sediment supply due to upstream damming, sea level rise and increased monsoonal storm activity linked to global warming, and lack of proper coastal land use planning. ICCF supports the SCC and its efforts to combat coastal erosion through expert briefings, multisector discussions, and field visits to see the issues first hand.

MARINE DEBRIS AND AIR POLLUTION

An environment free of marine and air pollution is necessary for the health of Thai people, marine life, and natural resources. Currently, Thailand is the world's sixth largest source of plastic polluting the ocean, with over 1 million tons per year. The government has initiated a plastic waste management plan to reduce the amount and increase the understanding of marine debris. Similarly, as Thailand's air quality reaches dangerous levels, building political will to address the real causes of this pollution is essential. The SCC's clean air priority requires strong, overarching air quality policy to address all types of air pollutants from various sectors. SCC works with relevant stakeholders to address marine and air pollution by declaring comprehensive and integrated policy actions and strengthening governance.

THE ICCF GROUP AND MINISTRIES

HOW THE ICCF GROUP IS ADVANCING THE
MANAGEMENT OF LAND AND SEA CRITICAL TO
MANKIND AND HIS PROSPERITY

INTERNATIONAL CONSERVATION CORPS

Through the International Conservation Corps program, the ICCF Group provides expertise to help partner nations develop protected-area, wildlife management, and conservation strategies. International Conservation Corps team members are veterans of U.S. and Canadian government agencies such as U.S. National Park Service, U.S. Forest Service, U.S. Bureau of Land Management, and U.S. Fish & Wildlife Service, and each member has decades of practical experience managing national parks, wildlife, forests, and water. These professionals work to complete demanding projects in countries in Latin America, Asia, Africa, and the Caribbean and have contributed over \$3 million in volunteer services to date.

NATURAL
RESOURCES
MANAGEMENT

HOW WE DO IT

ADDRESSING THE GAP IN CONSERVATION EFFORTS

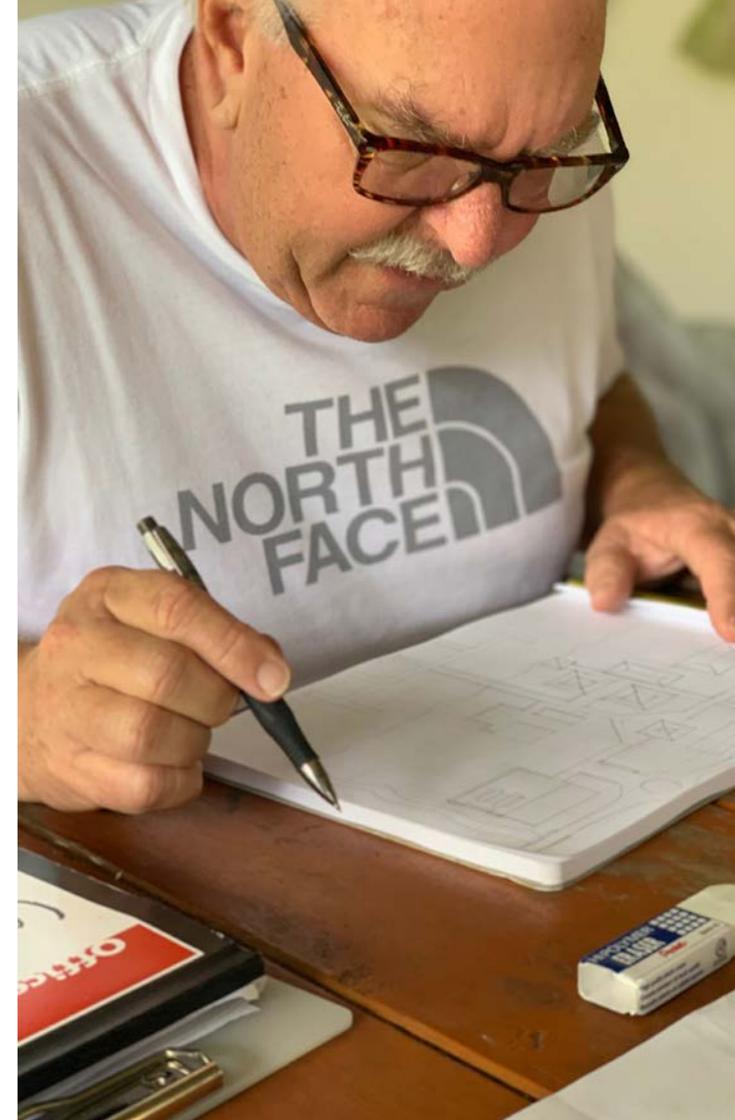

THE INTERNATIONAL CONSERVATION CORPS PROGRAM IS A HIGHLY EFFECTIVE, LOW-COST MEANS OF PROVIDING TECHNICAL ASSISTANCE, HELPING PARTNER NATIONS TO FULFILL THEIR OBJECTIVES AND TO DEVELOP INSTITUTIONAL AND HUMAN CAPACITY.

The program is the least costly way to project the vast U.S. experience in the management of national parks and natural resources in useful ways overseas, and it is more effective than other forms of technical assistance from the U.S., from other countries, and from often highly paid consultants.

U.S. and Canadian conservation agencies have long realized the potential of expanding their mission beyond their own borders to provide assistance and expertise in key regions but have lacked the funding to properly sustain international programs.

THE INTERNATIONAL CONSERVATION CORPS HAS THE SYSTEMIC CAPACITY TO CHANNEL THE EXPERIENCE AND TALENT OF THESE RESPECTIVE AGENCIES AND RETIRED EXPERTS TO MEET THE SPECIFIC NEEDS OF PARTNER NATIONS AND PROVIDE THE NECESSARY FUNDING AND IN-COUNTRY POLITICAL SUPPORT THROUGH THE ICCF GROUP.

GLOBAL CHALLENGES

Although most developing nations have set aside large areas for preservation, and much has been accomplished to scientifically catalogue critical natural resources, most of these nations lack the human and institutional capacity needed to manage these natural resources, leading to the destruction of biodiversity, water, and forests which are vital sources of environmental security, aesthetic value, cultural heritage, food security, and sustainable economic development.

THIS LACK OF CAPACITY LEADS TO UNSUSTAINABLE USE AND DESTRUCTION OF NATURAL RESOURCES THROUGH INAPPROPRIATE DEVELOPMENT, UNMANAGED TOURISM, POACHING, EROSION, POLLUTION, AND OTHER PROBLEMS.

To support the worldwide growth in human population and consumption, it is imperative to help overcome this global management deficit to ensure that economic and other benefits perpetually convey from ecosystems to forestry, fish, and wildlife sectors, the tourism industry, and agribusiness.
